

Smart E & P Networking

Geonet is a concept including Information & Communication Technology for E & P companies working on the Norwegian Continental Shelf. Geonet is a collection of products put together to provide our customers with the highest:

- Availability
- Performance
- Integrity
- Security
- Service

Geonet remote access overview

Geonet is suited for SMB E & P companies, and companies department which require the highest performance.

Working with seismic interpretation and managing reservoir data? Then your users will need the highest in performance and technology. Option Development together with partners provides this through the Geonet concept. With an operational datacenter tailored to your needs, we provide users with several possibilities for an efficient and productive work environment.

From full datacenter management and Remote Graphics accessibility to on-site IT operational management and support. With Geonet, your IT infrastructure can scale in conjunction with the company's needs.
